1. The census taker seems to have made an error in totaling column 8 (females 16-25 years old) at the end of page 27. Instead of writing 39, he wrote 29.
2. There is a discrepancy in the total of column 8 at the end of page 29. Taking in to account error #1, the total should read 53, but the census taker wrote 54. This could be an error made by the transcriber in transcribing an entry on pages 28-29 or this could be an addition error made by the census taker.
3. There is a discrepancy in the total of column 1 (males under 10 years old) at the end of page 35. The total should read 345, but the census taker wrote 342. This could be an error made by the transcriber in transcribing an entry on pages 34-35 or this could be an addition error made by the census taker.
4. Each of the totals impacted by these discrepancies is marked with an asterisk.
